

April Mann, MBA, CNMT, NCT, RT(N), FSNMMI-TS

President-elect

As we prepare for the future of Nuclear Medicine and Molecular Imaging, it is apparent the field will continue to face challenges within the current healthcare and economic environment. My experiences and knowledge with many of these changes occurring over the past few years is why I feel I am a solid candidate for this leadership position. As technologies advance towards hybrid models, we must identify the obstacles facing nuclear medicine technologists. As President-elect, I will work to bring collaborative efforts between the SNMMI-TS and Chapter to identify specific concerns from the grassroots level. There is much work the Chapters and SNMMI-TS leadership team will need to accomplish to ensure our members' concerns are addressed. My experience at the Chapter and National level will help us to accomplish our goals and to support our membership and the field.
